Answer with at least 3 features in each section

	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Utilize YahooFinance (API). ● Print a list of Stocks. ● Narrow down the list of stocks on screen (with the help of Math.random()) ● Loop an input via Scanner/IO that asks if the user is ready.	**Schedule - (For V2.0+)** ● Allow the user to be able to change the number of stocks shown on screen. ● Show a graph of stock performance. ● Allow the user to specify the sector/industry of stocks.
Not Important	**Delegate - (Use a library)** ● YahooFinance API. ● Math.Random library. ● Scanner/IO (for user input).	**Delete - (Cut it)** ● Sourcing from multiple APIs and imposing data checks. ● Adding saved history of previous suggestions. ● Showing public information about other people's suggestions.
